

Table 1: Median peak memory (MB) by grammar and input-size bucket. Blue is best, orange worst. This table mirrors the runtime-by-bucket table in the main paper (*Comparing Generalized Parsing Algorithms: An Empirical Study*) but for peak memory; it is provided here in the replication package rather than in the paper itself, since over three-quarters of its cells sit at the 0.016 MB measurement floor.

	Grammar	Tokens	Deterministic (MB)		Generalised (MB)
